

Frictionless **workflow automation** platform.

Making unstructured data interoperable

Most data is trapped

Trapped In Applications

Data is stored in different applications

People copy and paste from applications

Trapped In Volume

You can't find what you are looking for

Large number of man hours spent searching

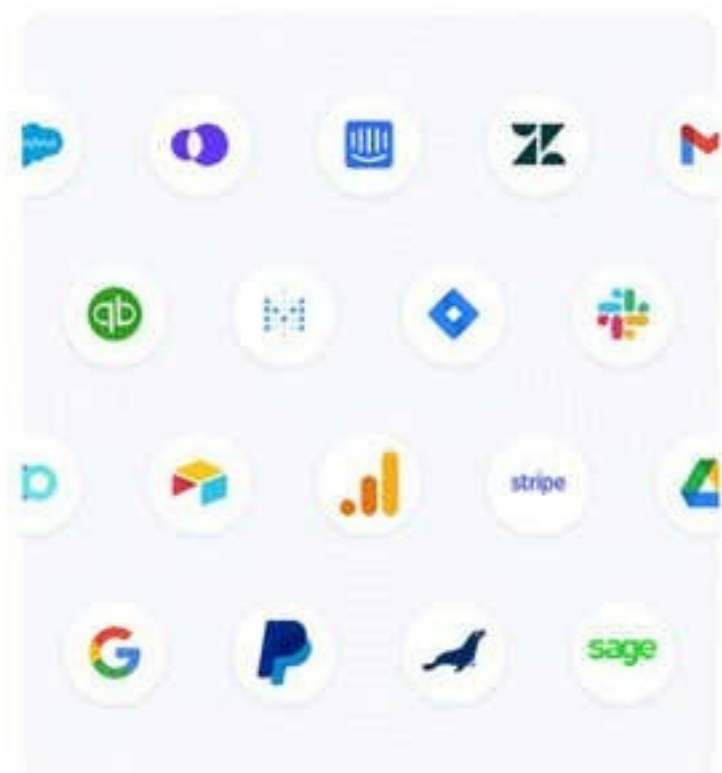

Trapped In Structure

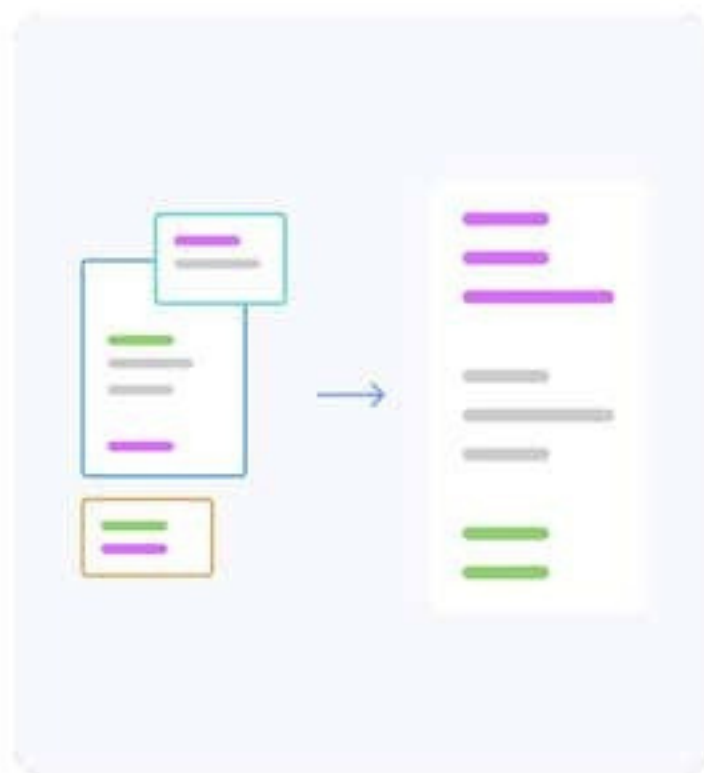

Structure is never useful or consistent

Dedicated staff to reformatting data

With Nanonets' AI Run workflows on any data

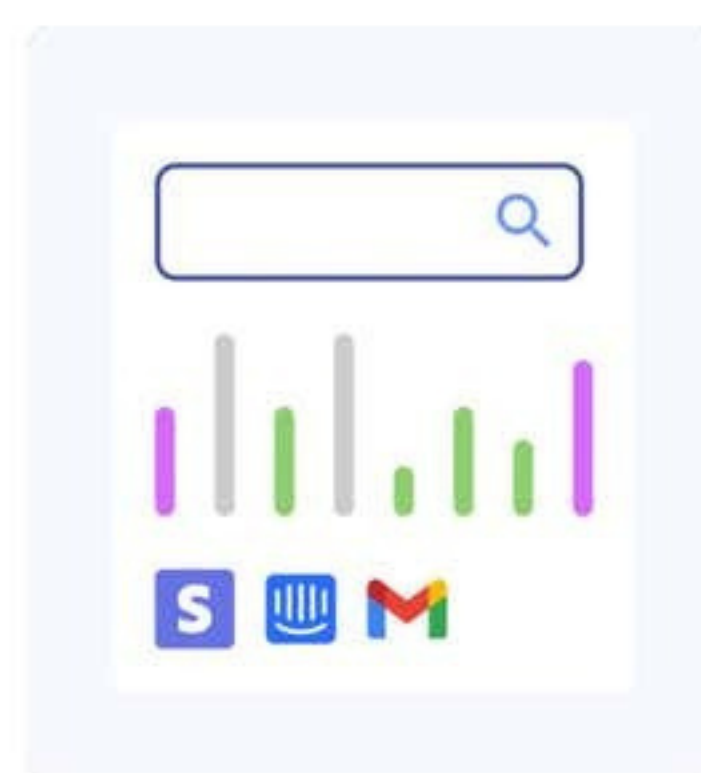

Integrate with any
Application

Convert to
structured data

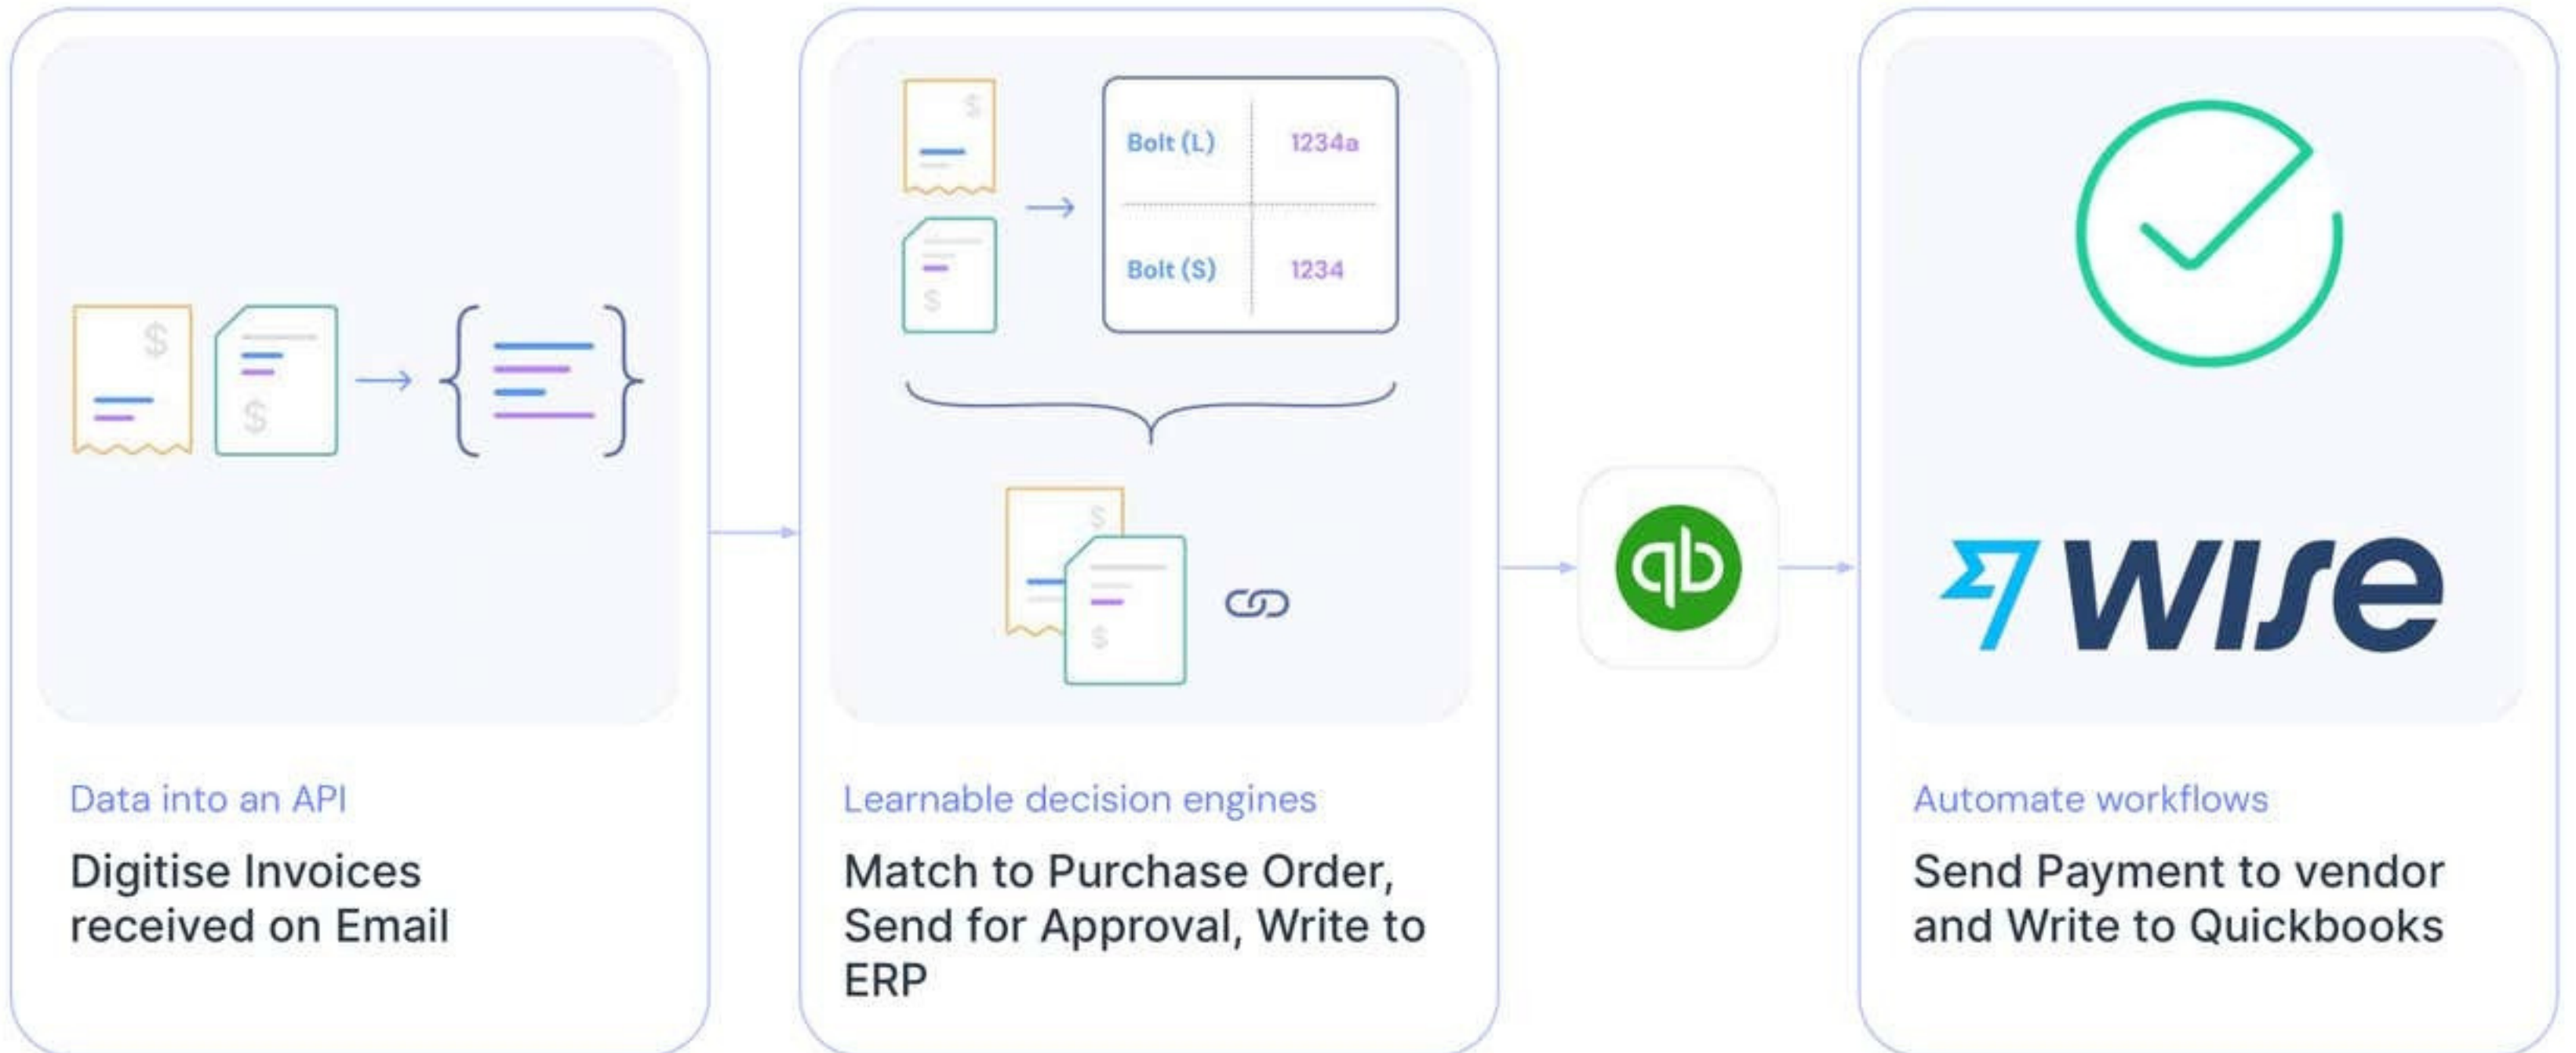

Run workflows on
unstructured data

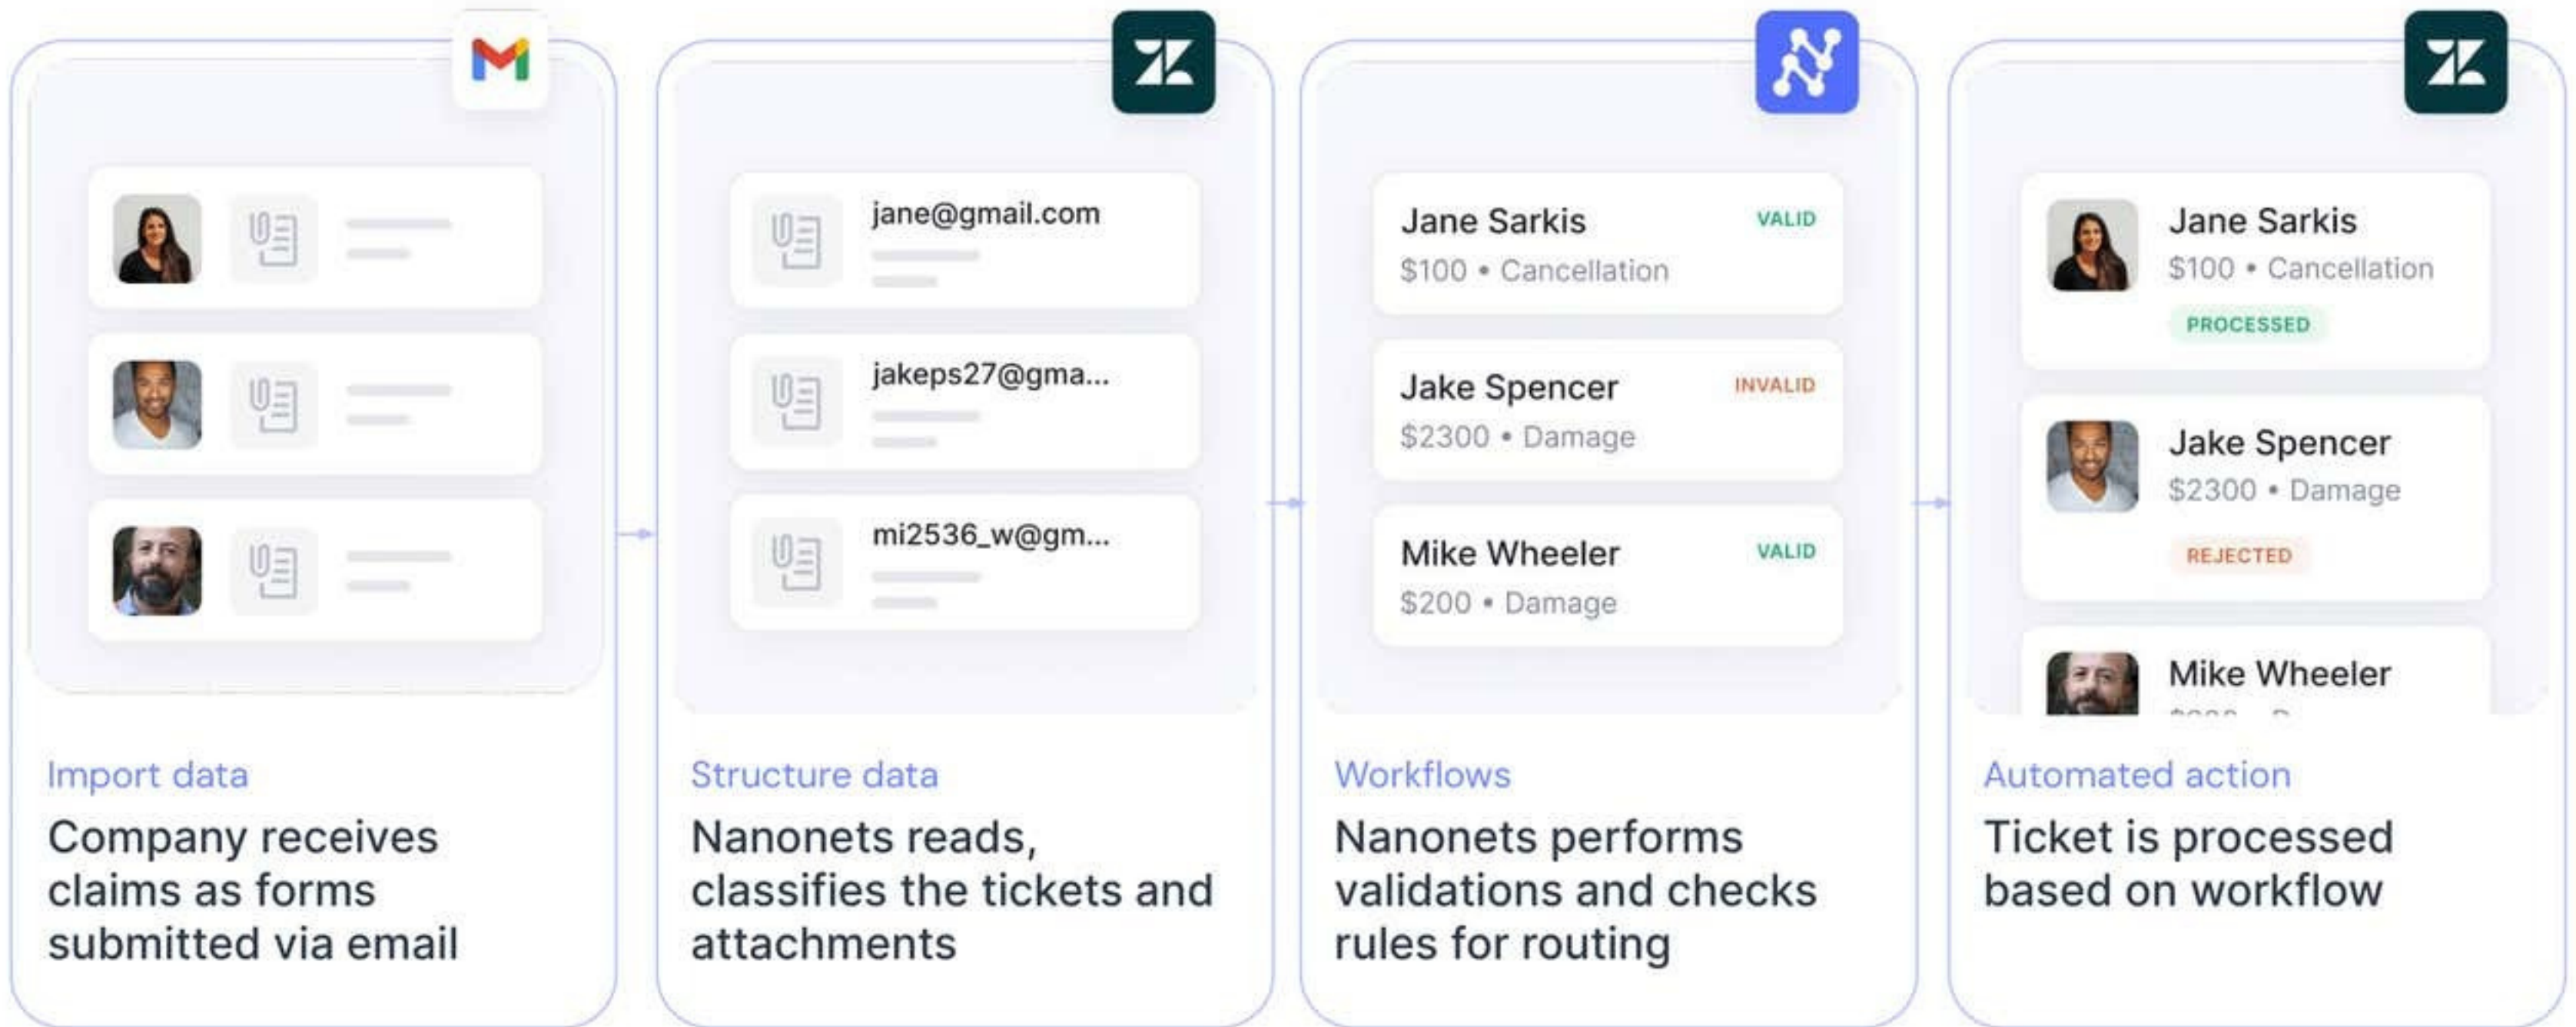

Actionable insights

United States | Logistics | 500 Person Private Company

United States | Customer service | \$1.6B Private Company

 Process Efficiency	Reduce Manual Data Entry Overhead	Moving back and forth between tools	Scale Faster
	Don't add more Headcount	Reduce Time to Process	Reduce Errors
	Low Accuracy	Doesn't Integrate	Too much support needed
 Cost Saving			
 Switching Vendors			

“For refund emails, create a Zendesk ticket. If <\$100, refund and log in Quickbooks. Initiate FedEx return, update Shopify on receipt, and resolve Zendesk ticket.”

For refund emails, create a Zendesk ticket. If <\$100, refund and log in Quickbooks. Initiate FedEx return, update Shopify on receipt, and resolve Zendesk ticket.

Large enterprise document processing solution takes a year to build in production

Why large enterprise chooses SaaS

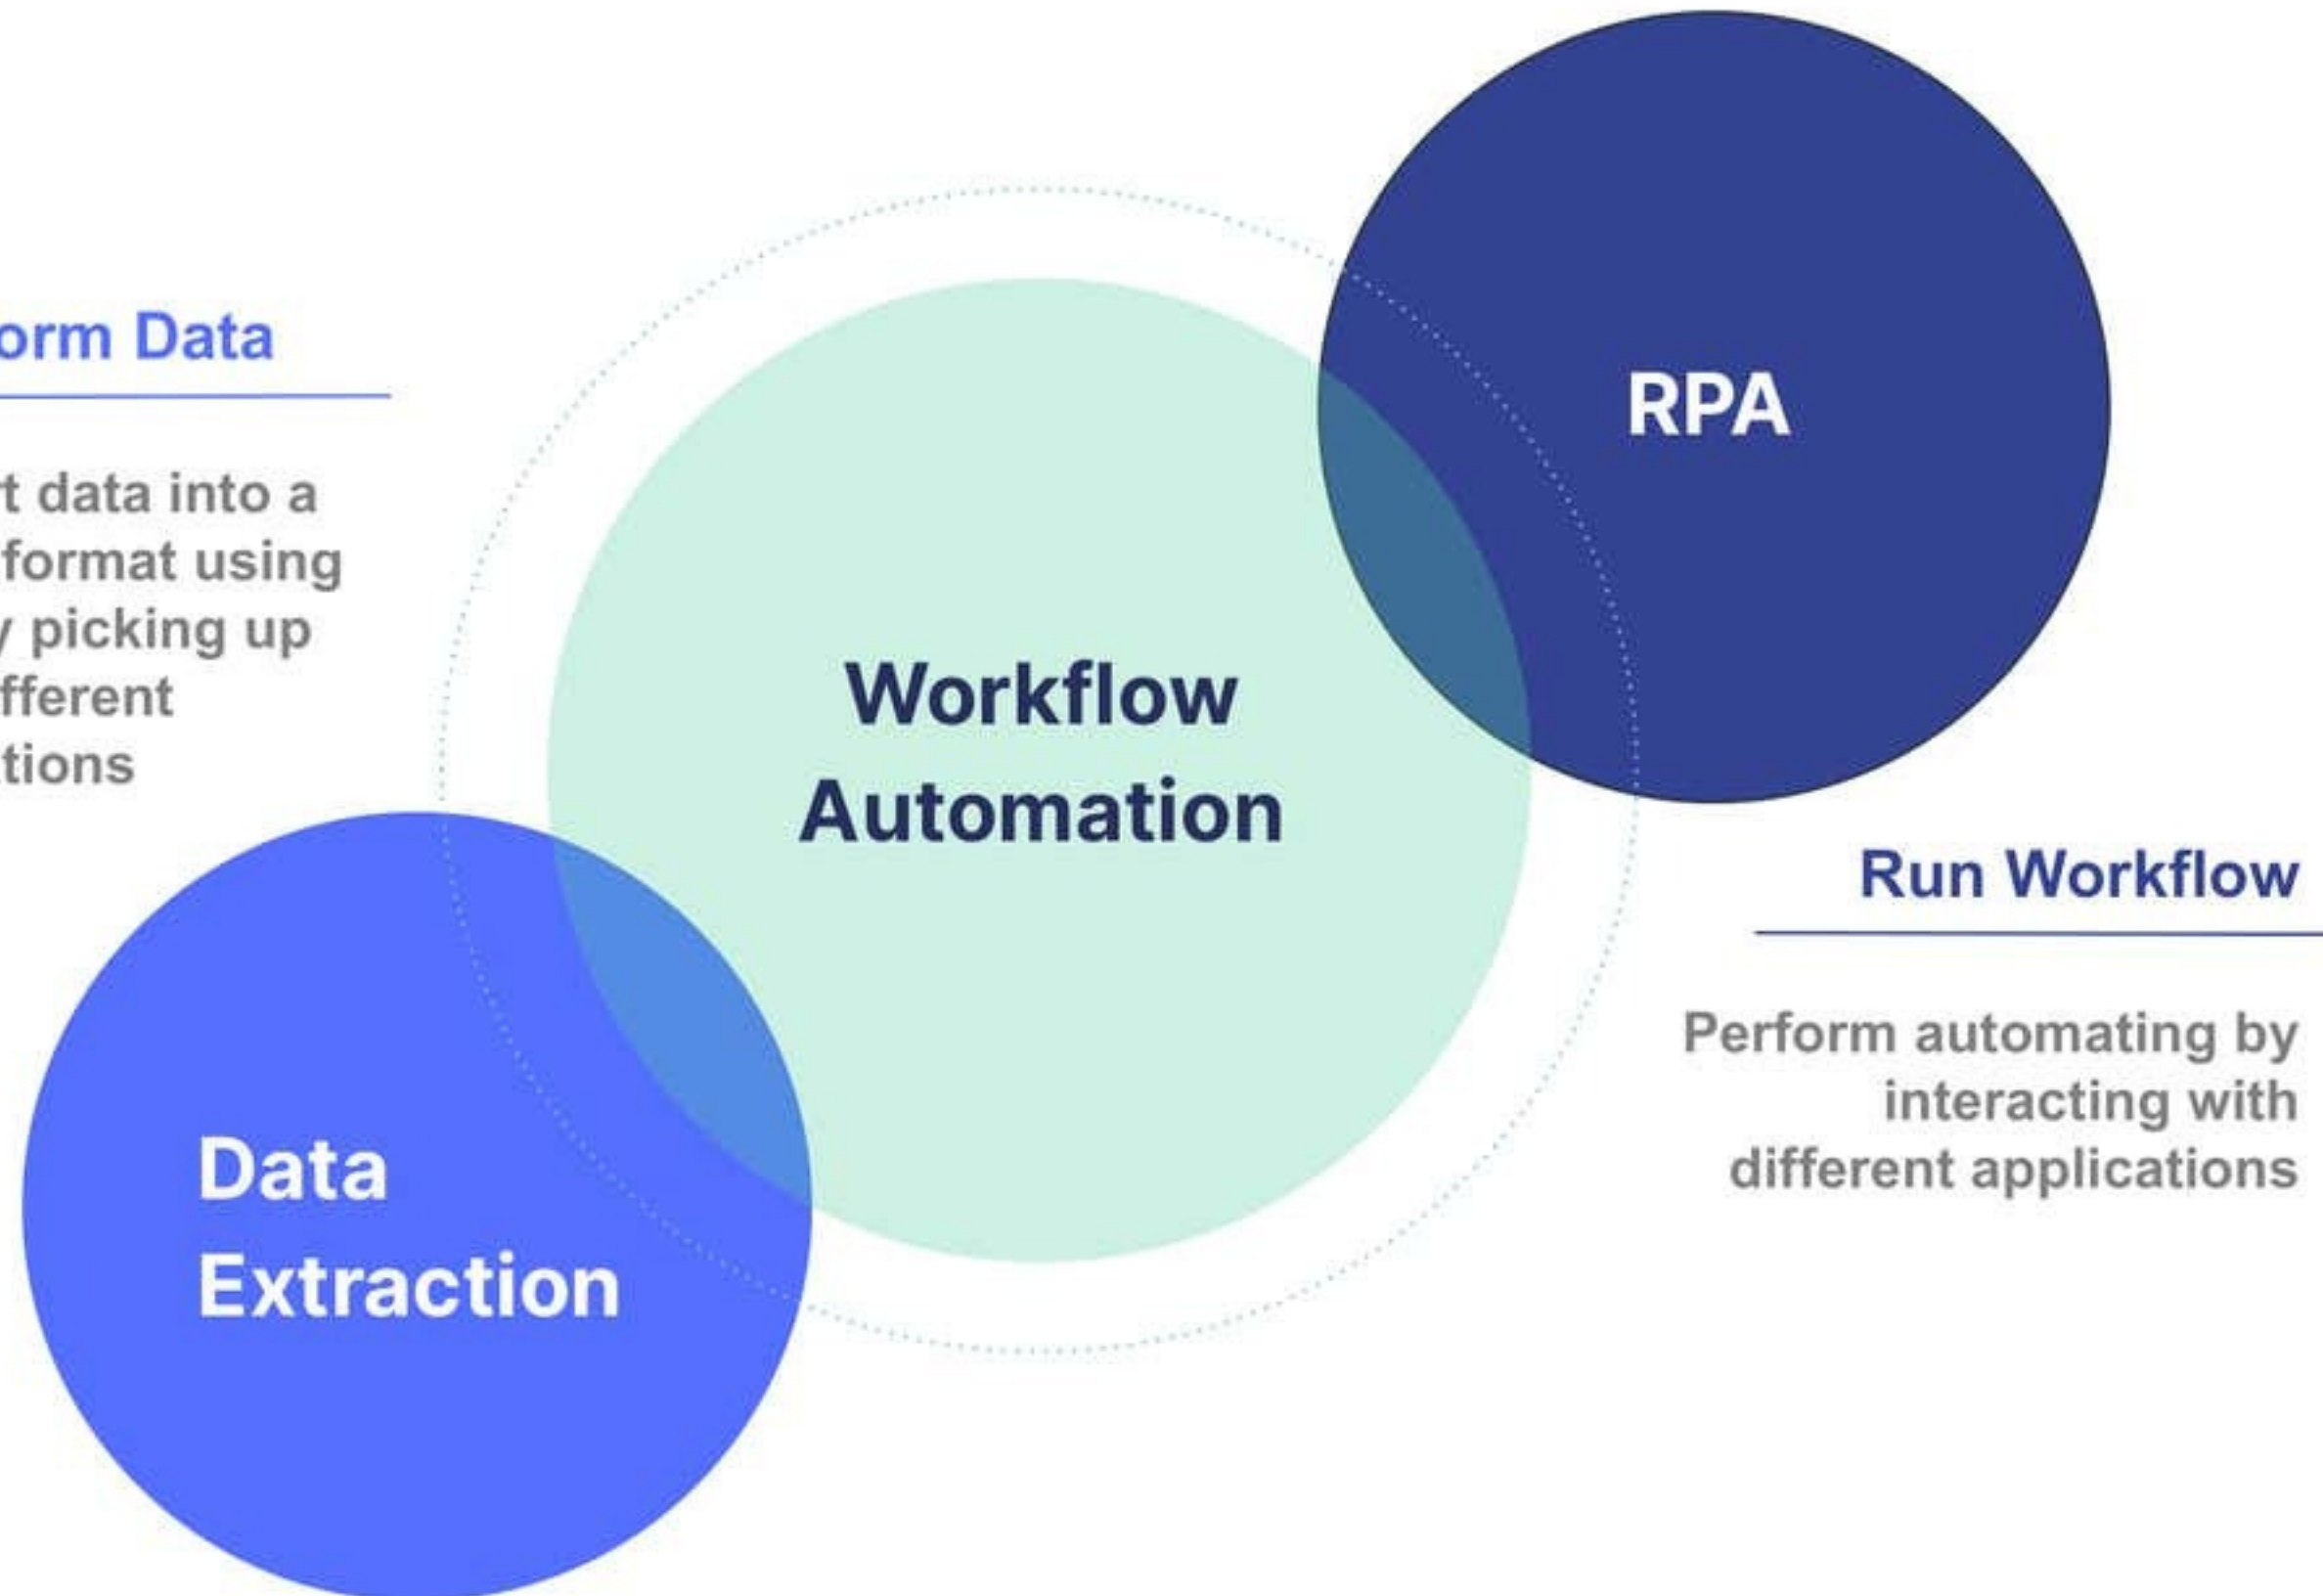

- Higher accuracy
- Faster go to market
- Low risk of failure
- Need minimal tech resources
- Continuous improvement

We are frequently approached by Fortune 500 companies for solving their use cases

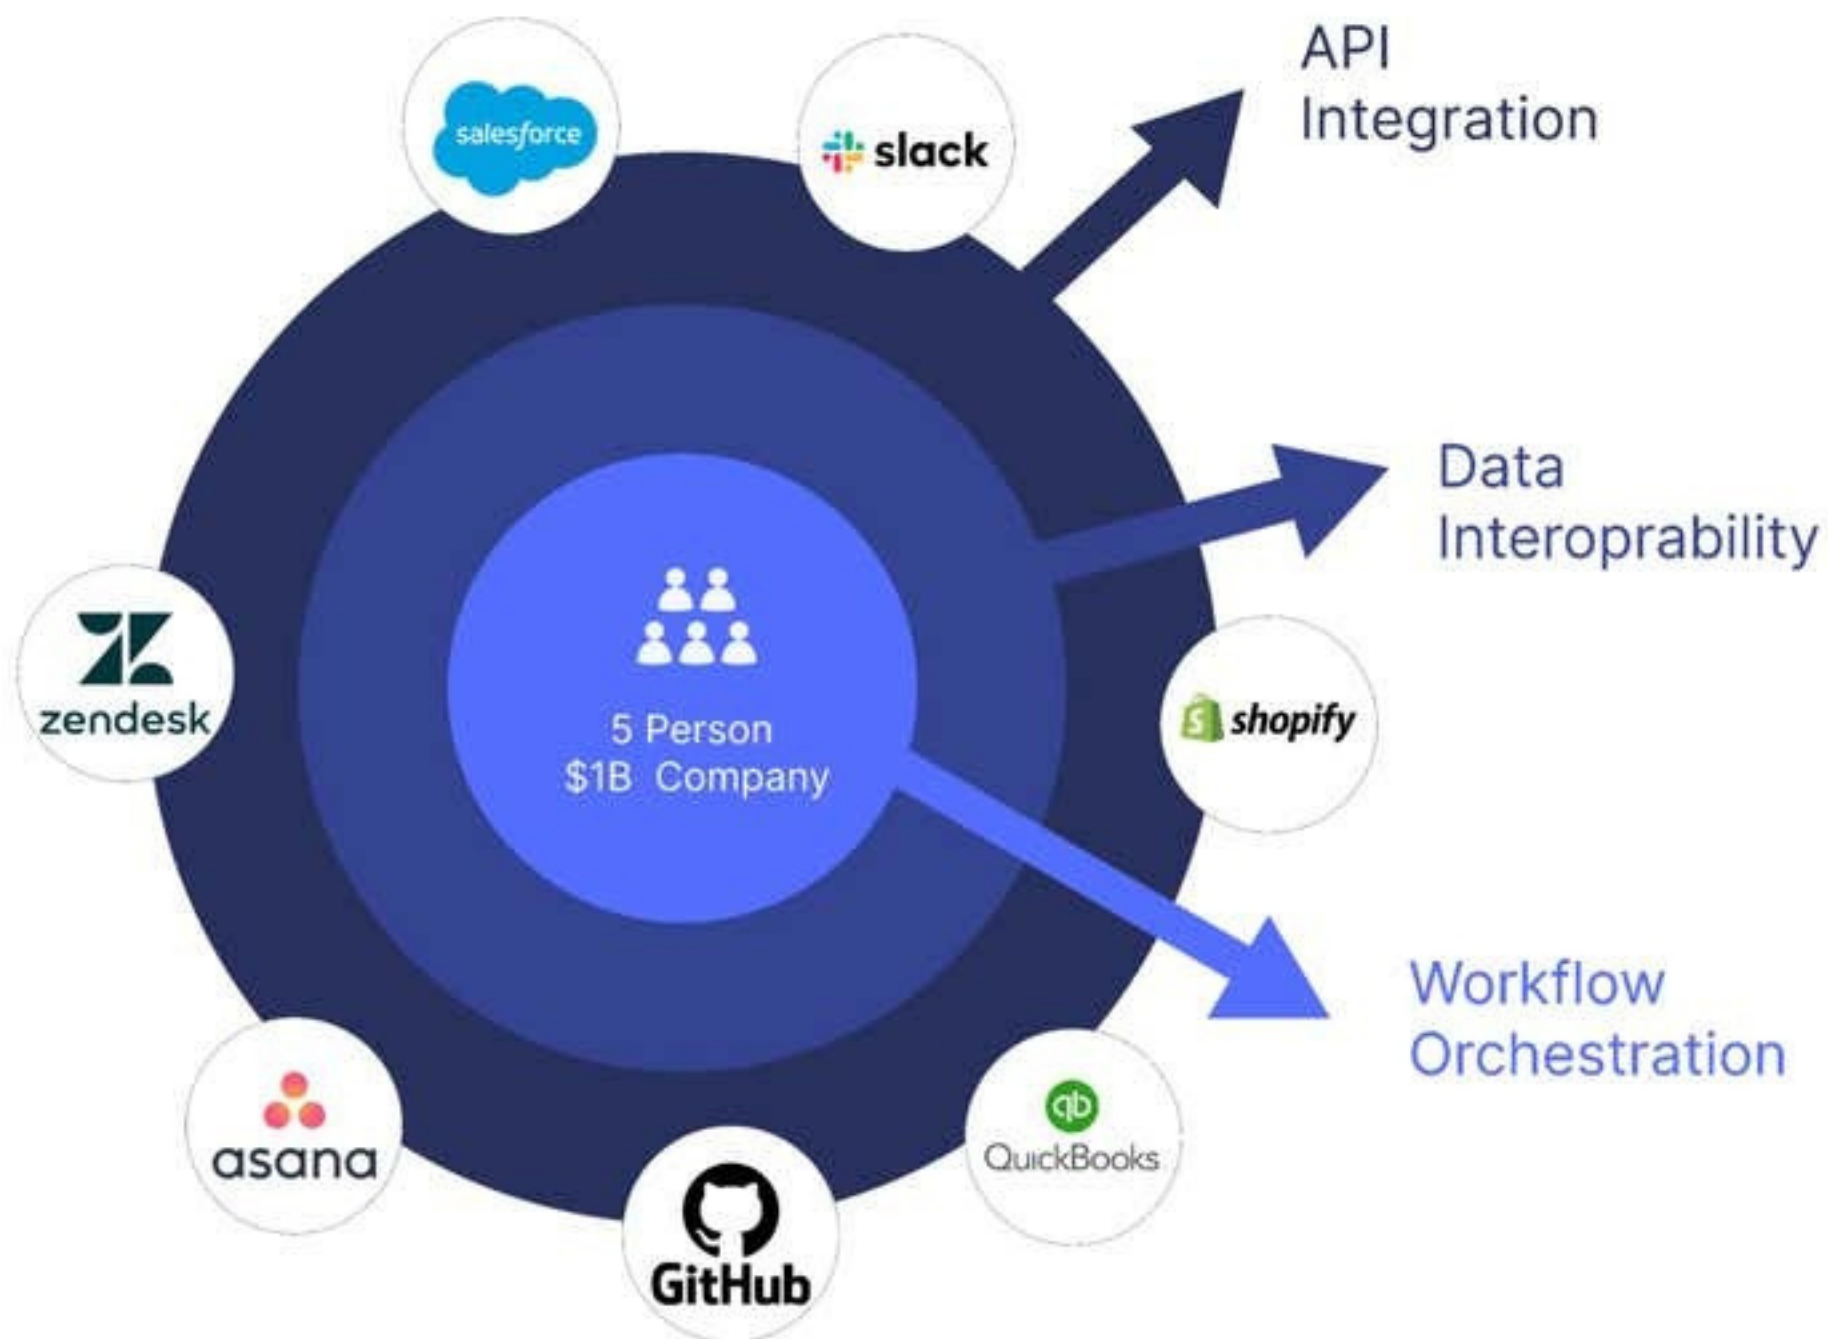

Transform Data

Convert data into a usable format using OCR by picking up from different applications

Run Workflow

Perform automating by interacting with different applications

Examples:

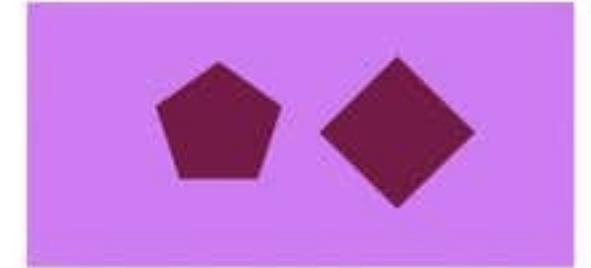

"For refund emails, create a Zendesk ticket. If <\$100, refund and log in Quickbooks. Initiate FedEx return, update Shopify on receipt, and resolve Zendesk ticket."

"When receiving a sales call inquiry, log it in Salesforce. If the lead scores >80, enhance details using Clearbit. Schedule a demo if requested, update lead status post-call, and set a follow-up in Outreach if interested."
