Hosting Options: Best of both worlds		

The DivvyCloud Platform

Action

User defined policy and **autonomous remediation** allows our customers to keep up with the rapid pace of change in the cloud

Platform

Extensible platform first approach provides our customers with the ability **customize** the software to meet the unique challenges of each enterprise.

Appliance

Our virtual appliances provides customers with a **secure**, extensible, and **flexible** access our solution.

Customer Story

- Large-scale cloud
- Moving their products to cloud-based delivery
- Had run POCs on all other tools in the market
- On-boarded DivvyCloud + 400 cloud accounts in a single Terraform in 1 hour
- Finally got visibility into their cloud footprint for the 1st time
- DivvyCloud + Cloudability integration for cost control automated actions

Customer Story

Fannie Mae®

- Highly regulated
- Massive data sets - every mortgage, deed and tax payer
- Based on success, also spread to sister org CSS (back-end securitization software) with even larger data sets
- Every mortgage in America is protected by DivvyCloud

Customer Story

- Cloud-native company
- Multi-cloud
- Replaced a competitor
- Needed action
- Needed integration with their own tooling
- High growth & complexity
- M&A management
